

PALM & GRACE

Phase 1 — Digital Memorial Platform

FINAL DEVELOPMENT PROPOSAL

Prepared for: Shoaib Akhtar
September 2026

A premium, responsive digital memorial platform for preserving memories, stories,
photographs and tributes.

1. Project Overview

Palm & Grace will be developed as a premium digital memorial platform that allows families to create and manage dedicated online memorial pages for their loved ones.

Each memorial will have its own unique URL where visitors can view the person's life story, photographs, service information, family acknowledgements, tributes and, where applicable, livestream and recording information.

The platform will be responsive, elegant, mobile-first and designed to provide a peaceful and respectful digital memorial experience.

Phase 1 will establish the complete core memorial platform, public website, administration system, memorial templates, QR system and visitor tribute functionality.

2. Phase 1 Objectives

- Premium public website
- Individual memorial pages
- Unique memorial URLs
- Three memorial design templates
- Admin management panel
- Memorial creation and editing
- Photo and media management
- Visitor tributes and moderation
- QR code generation
- Physical-print-friendly QR codes
- Livestream link functionality
- Recording link functionality
- Responsive mobile/tablet/desktop design
- Secure admin authentication
- PostgreSQL database
- Next.js full-stack application
- Production-ready architecture

The following are specifically NOT required in Phase 1:

- Subscription system
- Membership system
- Recurring payments
- Audio functionality

3. Website Structure & Pages

A. Public Website

1. Home Page

The homepage will introduce Palm & Grace and communicate the purpose of the platform.

- Hero section
- Palm & Grace introduction
- Memorial experience explanation
- How it works
- Memorial examples
- Key features
- QR memorial explanation
- Tribute/memory concept
- Call-to-action section
- Footer

2. Memorial Search / Memorial Directory

A public area where visitors can discover memorials, subject to the final approved design and privacy requirements.

- Search memorials
- Memorial name
- Memorial listing/cards
- Open individual memorial

3. Individual Memorial Page

Each memorial will have a unique shareable URL, for example: **palmgrace.com/memorial/john-doe**.

- Full name
- Date of birth
- Date of passing
- Biography / life story
- Main memorial photograph
- Photo gallery
- Service information
- Family acknowledgements
- Visitor tributes / memories
- QR access
- Social sharing
- Livestream section when a livestream link exists
- Recording section when a recording link exists

4. Memorial Templates

Phase 1 will include three connected but visually distinct memorial design directions:

Template 1 — Male Memorial

Premium, elegant and respectful visual direction.

Template 2 — Female Memorial

Elegant and refined visual direction while maintaining Palm & Grace branding.

Template 3 — Child Memorial

A softer and age-appropriate memorial presentation.

All three templates will use the same underlying memorial data and functionality. Administrators will be able to select the appropriate template when creating a memorial.

5. Memorial Information System

Each memorial will support structured information including:

- Full name
- Date of birth
- Date of passing
- Biography
- Life story
- Main photograph
- Photo gallery
- Service details
- Family acknowledgements
- Visitor memories
- Livestream URL
- Recording URL
- Memorial template
- Unique memorial URL

The system will allow administrators to update memorial information after publication.

6. QR Code System

Every memorial will have its own unique QR code. The QR code will link directly to that memorial's public page.

Physical Memorial Compatibility

QR codes will be generated at suitable quality for use on:

- Memorial cards
- Plaques
- Headstones
- Keepsakes
- Printed memorial materials
- Other physical memorial products

Administrators will be able to generate and download the QR code from the admin panel.

7. Livestream & Recording System

Livestream

If a memorial has a livestream link: **Livestream section** → **visible**

If no livestream link is provided: **Livestream section** → **automatically hidden**

Recording

If no recording link is available: **Recording section** → **automatically hidden**

If a recording becomes available after the livestream:

- Admin can add the recording link
- Admin can update the recording link
- Recording section becomes visible on the memorial page

This allows memorial pages to remain updated after the service.

8. Tributes & Memories

Visitors will be able to submit messages, memories and tributes. Submitted content will not immediately become public.

Workflow:

Visitor submits tribute → Tribute enters pending status → Admin reviews submission → Admin approves or rejects → Approved tribute appears on memorial page

9. Admin Management Panel

The administration system will be the central management area for Palm & Grace.

Dashboard

The dashboard will provide an overview of the platform, including relevant memorial and tribute information.

Memorial Management

- Create memorial
- Edit memorial
- Delete/manage memorial
- Select template
- Add biography
- Add dates
- Upload photos
- Manage gallery
- Add service information
- Add family acknowledgements
- Add livestream link
- Add recording link

- Generate unique memorial URL
- Generate QR code
- Publish/update memorial

Tribute Management

- View pending tributes
- Approve tributes
- Reject tributes
- Manage published tributes

Media Management

- Upload memorial photographs
- Manage uploaded media
- Replace/update photographs
- Manage gallery content

10. Public Memorial Experience

The public memorial page will be designed as a premium digital sanctuary.

Design direction:

- Elegant typography
- Generous spacing
- High-quality imagery
- Refined layouts
- Subtle transitions
- Responsive sections
- Calm and respectful visual presentation

The experience will be optimized for mobile, tablet and desktop.

11. Responsive Design

The entire platform will follow a mobile-first approach.

Supported devices:

- Mobile phones
- Tablets
- Desktop computers
- Large screens

All major public and admin interfaces will be designed to remain usable across different screen sizes.

12. Development Roadmap

Phase 1 — Foundation & Project Setup

- Project architecture
- Next.js setup
- Database setup
- PostgreSQL connection
- Environment configuration
- Authentication foundation
- Core application structure

Deliverable: Working project foundation.

Phase 2 — Public Website

- Homepage
- Navigation
- Footer
- Responsive layouts
- Palm & Grace visual system
- Feature sections
- Memorial introduction
- Mobile/tablet/desktop optimization

Deliverable: Complete public-facing website.

Phase 3 — Memorial System

- Memorial database structure
- Memorial creation
- Memorial editing
- Memorial data fields
- Unique memorial URLs
- Memorial templates
- Public memorial page
- Photo gallery
- Service information
- Family acknowledgements

Deliverable: Complete memorial creation and viewing system.

Phase 4 — Admin Panel

- Admin login
- Dashboard
- Memorial management
- Template selection
- Photo/media management

- Service information management
- Livestream management
- Recording management
- Memorial publishing
- QR generation

Deliverable: Functional centralized administration system.

Phase 5 — Tributes, QR & Event Features

- Visitor tribute submission
- Pending/approved workflow
- Tribute moderation
- QR generation
- QR download
- Print-friendly QR output
- Livestream link functionality
- Recording link functionality
- Conditional visibility of livestream/recording sections

Deliverable: Complete visitor interaction and memorial access features.

Phase 6 — Testing, Optimization & Deployment

- Functional testing
- Responsive testing
- Admin testing
- Memorial workflow testing
- QR testing
- Tribute moderation testing
- Livestream/recording testing
- Performance optimization
- Security checks
- Production deployment
- Final handover

Deliverable: Tested and production-ready Phase 1 platform.

13. Phase 1 Functional Flow

Admin Flow

Admin Login → Dashboard → Create Memorial → Enter Memorial Information → Select Memorial Template → Upload Photos → Add Service Information → Add Livestream / Recording if available → Generate QR Code → Preview Memorial → Publish Memorial

Visitor Flow

Open Palm & Grace → Find / Open Memorial → View Memorial Page → Read Life Story → View Photos → View Service Information → View Livestream if available → View Recording if available → Read Tributes → Submit Memory / Tribute

14. Conditional Memorial Features

The memorial page will dynamically display optional sections according to available information.

No Livestream Link: Livestream section remains hidden.

Livestream Link Available: Livestream section becomes visible.

No Recording: Recording section remains hidden.

Recording Added Later: Admin adds the recording link → recording section becomes visible.

This keeps the public memorial page clean and prevents empty sections.

15. Phase 1 Exclusions

The following are outside the Phase 1 development scope unless separately agreed:

- Subscription functionality
- Membership functionality
- Recurring payments
- Payment gateway
- Audio functionality
- Advanced features not listed in this proposal
- Future-phase modules
- Unspecified third-party integrations

16. Future Scalability

The Phase 1 architecture will be structured so that Palm & Grace can be expanded in future phases.

Potential future functionality can be developed separately without being part of the current Phase 1 scope.

Examples may include:

- Additional memorial templates
- Additional integrations
- Membership/subscription functionality
- Payment systems
- Advanced memorial features
- Additional communication functionality

17. Testing & Quality Assurance

Before final handover, the Phase 1 platform will be tested for:

- Public website functionality

- Memorial creation
- Memorial editing
- Unique URLs
- Template selection
- Image/media functionality
- QR generation
- QR scanning
- Tribute submission
- Tribute moderation
- Livestream visibility
- Recording visibility
- Admin functionality
- Responsive design
- Basic performance
- Production deployment

18. Final Phase 1 Deliverables

At completion, Palm & Grace Phase 1 will include:

- Public Palm & Grace website
- Individual memorial pages
- Unique memorial URLs
- Three memorial templates
- Admin management panel
- Secure admin authentication
- Memorial creation/editing
- Photo gallery/media management
- Service information
- Family acknowledgements
- Visitor tributes
- Tribute moderation
- QR code generation
- Print-friendly QR codes
- Livestream links
- Recording links
- Conditional livestream/recording sections
- Responsive mobile/tablet/desktop design

- Next.js full-stack application
- PostgreSQL database integration
- Production deployment support
- Testing and final handover

19. Scope Confirmation

This document represents the final Phase 1 development scope based on the original Palm & Grace requirements and the additional clarifications provided by the client.

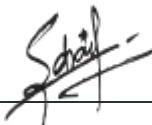

All features specifically listed in this document are included within the agreed Phase 1 scope.

Any functionality not listed here, or any additional module requested after scope approval, will be reviewed and quoted separately.

20. Client Approval

I confirm that I have reviewed and approved the above Phase 1 scope for Palm & Grace development.

Client Name: Muhammad Sohail Sajjad

Signature: 

Date: 09/25/2026

Developer: Ali

Signature: Ali

Date: 25 September 2026

2. Domain, Hosting, Paid Services & Client Access

- The website domain will be owned by the Client.
- One year of VPS hosting for the website will be provided by the Developer (Ali Akbar).
- Relevant paid services/subscriptions used in the website will be provided free of charge for the first two months.
- After the first two months, the Client (Sohail) will be responsible for paying the fees for those paid services/subscriptions.
- A live website link will be provided to the Client so that the Client can review, check and verify the website.
- After completion of the first year of VPS hosting, the Client (Sohail) will pay USD 45 per year for VPS renewal.
